

DANGEROUS SNAKES OF BOTSWANA

Botswana has fifty eight different types of snakes. Twenty two species are not venomous, while seven can inflict rather painful bites. Nine species are considered potentially deadly.

VERY DANGEROUS

Has caused human fatalities

DANGEROUS

Painful bite, but does not require antivenom

EMERGENCY PROTOCOL

In the event of a snake bite

- 1 Keep the victim calm, immobilized and transport the victim to the closest hospital **without delay**.
- 2 If the victim stops breathing, resort to artificial respiration or make use of a Bag Valve Mask.
- 3 Call the Poison Information Centre help-line for further advice: 0861 555 777.

DO NOT

- ... apply a tourniquet.
- ... cut and suck the wound.
- ... use ice or very hot water.
- ... give the victim alcohol.
- ... apply electric shock.
- ... inject antivenom randomly.

Antivenom (if required) must be administered by a doctor in a hospital environment.
